Ebbony

Thanks for recent e-mail and attached is previous e-mail sent by Dave Taylor regarding Heat Dump - I hope this is sufficient information for you. In regard to the external ductwork it is galvanised finish so has a bright metal appearance associated with galvanised metals and a note to this effect is on the submitted drawing.

Can you give me a call if further information is required as we'd like to resolve this job to everybodies satisfaction asap (as would you no doubt!)

Thanks

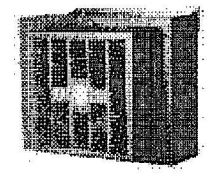

Paul

For the attention of Mr. Giles Rawdon
Environmental Health Officer

Planning Reference 10/01007/FUL The Gate Inn Public House. Osbaston. Leicestershire.

Client. Marstons Inns and Taverns. Marstons House. Wolverhampton.

Dear Mr Rawdon

With reference to the above planning application and approval.

Planning conditions. Item 7a requires information on siting of equipment, Method of installation of equipment, Noise performance of equipment. We have recently supplied this information to both planning and environmental health departments. Further to this we have been requested to inform you of maintenance and maintenance management for the above equipment.

We manufacture the walk-in coldrooms and acoustic unit housings at our factory in Nottingham. We prepare the condensing units, evaporators and associated control equipment ready for installation. Our directly employed teams of engineers and fitters carry out the installation work in total.

With regard to after sales service, repairs and maintenance of equipment this is controlled and managed by our service department in conjunction with the Building Maintenance Department of Marstons Inns and Taverns.

We also employ a team of qualified and trained commercial refrigeration service engineers who are fully equipped to carry out repairs and planned maintenance to ensure our equipment operates efficiently and power consumption and noise levels are within the design parameters.

If you require additional information please contact me by phone on 07831 462464 or e.mail david.harris@btconnect.com

Yours sincerely

David Harris
