REASON FOR RECOMMENDATION PROVIDED:	
- The site is in an urban area, although there is some suitable bat foraging habitat immediately adjacent to the property provided by mature trees and an urban park. - The proposed development will involve alterations to the existing roof structure. - However, having viewed the property on google street-view, it appears to be in good condition, and unlikely to provide suitable features for roosting bats. - As such, no surveys are required and I have no objections or further comments to make.
