

SURFACE MATERIALS

LIMESTONE GRAVEL, IN LIGHT BUFF FINISH, SOURCED LOCALLY (10mm AGGREGATE). LIMESTONE IS A MATERIAL THAT WAS LOCALLY SOURCED AS PART OF THE WIDER LANDSCAPE HERITAGE AND CHARACTER, AND SOURCING THIS MATERIAL LOCALLY HELPS IN ENSURING THE DESIGN IS SUSTAINABLE. THE LIGHT BUFF COLOURING HELPS THE SURFACE TO HAVE A NATURALISTIC TONE, AND ENABLES THE SURROUNDING SOFT LANDSCAPING TO HAVE REAL IMPACT IN CONTRAST. GRAVEL AS A TEXTURE GIVES A VARYING DYNAMIC TO THE DESIGN, WHILST TIES INTO THE NATURALISTIC THEME OF THE DESIGN.

CLAY PAVERS, MATCHING BRICKS USED ON EXTERIOR OF PROPOSED BUILDING. CLAY OFFERS A RENEWABLE RAW MATERIAL SOURCE, WHICH HAS LOW ENVIRONMENTAL IMPACT. THE RUSTIC APPEARANCE HELPS THE HARD SURFACING BLEND INTO THE NATURALISTIC SURROUNDINGS MORE SEAMLESSLY. WHILST THE RICH BROWN/RED COLOURING TIES INTO THE BUILDING, AND ENABLES THE SURFACE TO HAVE INDIVIDUAL VISUAL IMPACT AT THE SAME TIME.

LIMESTONE PAVING, IN LIGHT GREY FINISH, SOURCED LOCALLY (900 x 600mm). LIMESTONE AGAIN IS SYNONYMUS IN THE UK, AND SOURCING THIS MATERIAL LOCALLY HELPS IN ENSURING THE DESIGN IS SUSTAINABLE. THE LIGHT GREY COLOURING HELPS SURFACE TO VISUALLY BE MORE DISCRETE, AND ENABLES THE SURROUNDING SOFT LANDSCAPING TO HAVE REAL IMPACT. THIS, ALONG WITH THE GRAVEL, ALLOWS THE MORE IMPACTFUL VISUAL OF THE CLAY PAVING TO BE CHAMPIONED, AS THE MORE NEUTRAL COLOURS ARE MORE SUBDUED AND HELP FRAME CERTAIN VISUALS THROUGH THE DESIGN.
