

Rear elevation - parapet roof, no gutter to allow rain run off

Side elevation - no windows or doors will be installed

Visible materials will be wood - 44mm T&G. Stained with a dark natural wood finish.
The garage doors will be composite - anthracite in colour.
The floor will have a metal sub frame, attached to screw in pylons (positioned to avoid major tree roots).
The garage floor will be wooden.
The garage will float on the pylons approx 50mm above the ground to avoid compaction and to allow the tree to thrive.

Side elevation - showing specific dimensions for roof slope - this will not be physically visible from the side. The left and right elevations are identical
