

Planning Application Gerrards Corner – Lower Field

Real Motorsport Ltd the (Mallory Park) request to change the use of 'Gerrards Lower Field' (see attached plan).

The field to be used for two activities an #1 Oval Track, and #2 Durability Test Track.

#1 Oval Track

This is an oval dirt track (compacted) for the use of 'FlatTrack' racing. This would take place on 6 occasions per year, normally on a weekend.

In July 2023, weekend (15th + 16th) a test event took place as part of the National Championships, although the weather on Saturday made it unsuitable to use the track, on Sunday the event ran successfully.

During this test weekend there was no impact on the public footpath, which had a manage crossing point, and noise levels were of no issue.

Next proposed use would be 2024.

#2 Durability Test Track

This proposed Motorcycle Manufacturers Test Track, is for Royal Enfield who current carry out this testing in India and want to be able to conduct in the UK. Activity would be for testing motorcycle and bicycle frames.

This would take place on weekdays and consist of one machine at a time, with two or three test operatives on site.

The public footpath crossing point would not be managed for these days as once the test team are in, they would not cross the footpath until they finish at the end of the day.

Noise there would only be one motorcycle at a time and Royal Enfield is the leading the push for smaller capacity machines 350cc etc. When in use for bicycle testing then no noise would be made.

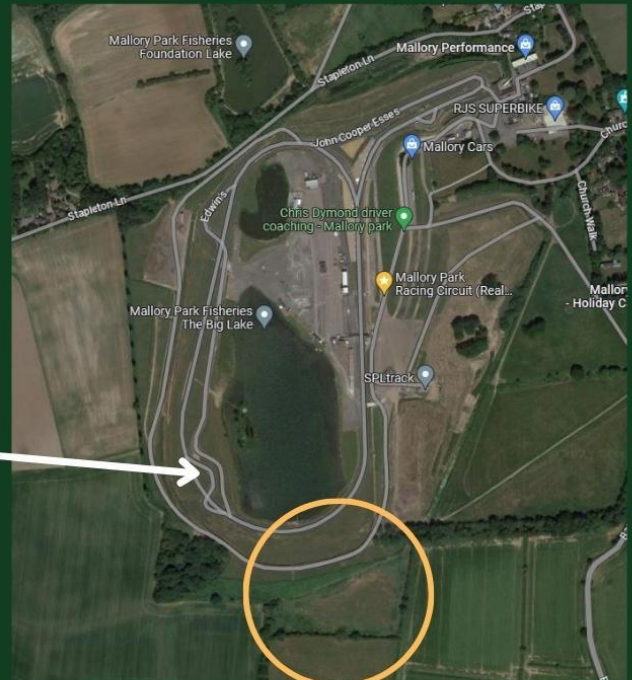

We would look to have this facility in operation early 2024.
