Description

Please describe details of the proposed development or works including any change of use

Removal of an existing dilapidated two-storey rear extension, and construction of a new single-storey traditionally built extension.

Has the work or change of use already started?

☐ Yes

☒ No

Explanation for Proposed Demolition Work

Why is it necessary to demolish all or part of the building(s) and/or structure(s)?

The existing rear extension to 96-98 Castle Street is of a prefabricated construction, typical of temporary buildings. It is not in keeping with the historical fabric of the main building, and represents a negative imposition on the Hinckley Town Centre Conservation Area. The facilities in the extension are cramped and in need of modernisation, and moreover the poor condition of the existing extension (the prefabricated construction having outlived its serviceable lifespan) means that it is rapidly becoming a potential hazard.

To assist in answering this question correctly, please refer to the help text which provides guidance on determining if any important biodiversity or geological conservation features may be present or nearby; and whether they are likely to be affected by the proposals.

☐ Yes, on the development site

☐ Yes, on land adjacent to or near the proposed development

☒ No

Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Your local planning authority will be able to advise on the content of any assessments that may be required.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

☐ Yes

☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:

Development subject to the de minimis exemption (development below the threshold)

What best describes the size of your site?:

Over 25 square metres

Please justify the reason why biodiversity net gain does not apply:

Although the site area extends to 215sqm, the proposal is only for a small extension to what is an existing building, and therefore the proposed building work will only impact an area of the site that is much less than 25sqm (approximately 12sqm). Full planning is only required due to the proposal site being within the curtilage of the Hinckley Town Centre conservation area. Being an existing building in a town centre, there are no onsite habitat areas, and the proposed construction work will lead only to the dismantling of an existing extension and its replacement with a new extension of a similar footprint. No other changes to the fabric of the existing building or the wider extents of the site are proposed.

Note: Please read the help text for further information why developments may be exempt or not in scope.
