<b>No comment</b>	
<b>No objection (for recommended conditions or informatives- see below)</b>	
<b>Recommend Refusal</b>	
<b>Holding Objection - Further information required</b>	<input checked="" type="checkbox"/>
<b>REASON FOR RECOMMENDATION:</b>	
<ul style="list-style-type: none"><li>• On the start page of the Statutory Biodiversity Net Gain Metric Calculation Tool (7th October 2012) it states it was completed in 2012. <b>Please can this be corrected to the date that the metric itself was completed.</b></li><li>• The document titled Preliminary Ecological Appraisal (PEA) on the portal does not contain the PEA report itself and shows a quotation from the ecological consultant. <b>The PEA report itself needs to be made available for review.</b></li><li>• The Update Ecology Survey (FPCR, September 2025) has been reviewed and summarises no significant ecological changes or constraints to the site. Precautionary working methods for reptiles have been recommended.</li><li>• The Biodiversity Net Gain Design Stage Report (RSK Wilding, October 2025) is comprehensive and clearly shows the areas subject to habitat degradation. The suggested enhancements are locally appropriate, however 10% gain in habitats has not been achieved, and therefore purchase of off-site units is required.</li></ul>	

- If this is being secured through a Section 106 agreement with the determining authority, this will also need to be monitored for compliance during this 30-year term and a fee will be charged by the determining authority for this, through an appropriate clause in the Section 106 agreement against the current Charging Schedule.

**ANY RECOMMENDED CONDITIONS TO BE APPLIED:**

- The development hereby approved shall be implemented in strict accordance with the measures stated in the recommendations section of the Update Ecology Survey (FPCR, September 2025) unless otherwise agreed in writing by the Local Planning Authority.
- No development shall take place (including ground works or vegetation clearance) until a Landscape and Ecological Management Plan (LEMP) has been submitted to and approved in writing by the Local Planning Authority. The LEMP shall include the following details:
  - description and evaluation of the features to be created/enhanced
  - aims and objectives of management
  - appropriate management options for achieving aims and objectives
  - prescriptions for management actions
  - work schedule
  - species/seed mixes to be planted/sown
  - ongoing monitoring and remedial measures
- The approved plan will be implemented in accordance with the approved details, unless otherwise agreed in writing by the Local Planning Authority.
- No development shall take place (including ground works or vegetation clearance) until a Habitat Management and Monitoring Plan (HMMP) has been submitted to and approved in writing by the Local Planning Authority.
- The approved HMMP shall be adhered to and implemented, unless otherwise agreed in writing by the Local Planning Authority.
- Reason: to ensure that protected species and habitats are taken into consideration according to legislation under the Habitats and Species Regulations (2017) and the Wildlife and Countryside Act (1981) and their amendments.
