Description of Proposed Works

Please describe the proposed works

Installation of Air Source Heat Pump to provide heat for Domestic Hot Water and Domestic Central Heating in accordance with Microgeneration Certification Scheme Planning Standards (MCS 020). The DHW and DCH are currently provided from an oil fired (Kerosene) boiler. Installation of an ASHP would eliminate emissions to air from the burning of 1500 litres per annum at the property which includes green house gases and poisonous gases such as CO₂, Nitrogen Oxide and Sulphur Dioxide.

As there is an existing ASHP installed by the previous owner which providing air conditioning to the kitchen / diner, the installation of a second ASHP falls outside permitted development hence this application for consent for the installation of an additional ASHP at the property. The proposed installation would also marginally exceed the MCS standards for noise levels under permitted development, which would also suggest a requirement for planning permission..
