SUMMARY OF ECOLOGICAL DOCUMENTS CONSIDERED:		
Applicant submitted information: Existing and Proposed Site Elevations, Site Location Plan, Proposed plans, aerial photos		
REASON FOR RECOMMENDATION PROVIDED:		
- The proposed works consist of a two-storey side extension on the east elevation of the existing property, sited on what appears to be existing garden. It is located within an urbanised area with no direct connectivity to good bat foraging habitat, nor the wider arable land. - The works will tie into the existing roof on the east side of the existing dwelling however, ariel photos show the soffits and roof are in good condition and it appears other recent works have been carried out on the property. As such, requesting surveys would not be proportional. - Therefore, no ecological surveys are required.
