

CONSULTATION TEMPLATE RESPONSE FROM LEICESTERSHIRE COUNTY COUNCIL:

ECOLOGY AND BIODIVERSITY PLANNING ADVICE

COUNTY, DISTRICT OR BOROUGH	Hinckley and Bosworth Borough Council	
APPLICATION NUMBER	25/00542/FUL (4 th Reconsultation)	
ADDRESS	Trout Ponds Farm Twycross Road Sheepy Magna Leicestershire	
DESCRIPTION OF DEVELOPMENT	Proposed change of use of existing livery buildings and hardstanding to storage and distribution (Class B8)	
PLANNING CASE OFFICER	Sullivan Archer	
DEPARTMENT	Ecology	
PLANNING ECOLOGY OFFICER	Olivia Larter	
DATE OF COMMENTS	7 October 2026	
ECOLOGICAL DOCUMENTS REVIEWED:		
• The Statutory Biodiversity Metric – Calculation Tool (October 2025) • Biodiversity Net Gain Assessment (V4) (Midnorth Ecology, September 2026) • Condition Assessment Sheets (May 2026) • Preliminary Ecological Appraisal (V2) (Midnorth Ecology, April 2025) • Preliminary Roost Assessment (Midnorth Ecology, April 2025) • Nocturnal Emergence Survey report (Midnorth Ecology, May 2025) • Site Location Plan (Revision E) (Hardwick Studio Architects, March 2026)		
SUMMARY RECOMMENDATION:		
No comment		☐
No objection (for recommended conditions or informatives- see below)		☒
Recommend Refusal		☐
Holding Objection - Further information required		☐
REASON FOR RECOMMENDATION:		

We have reviewed the additional documents provided by the applicant relating to mandatory biodiversity net gains.

We are now satisfied that there is sufficient ecological information available to support determination of this application.

This provides certainty for the LPA of the likely impacts on designated sites, protected and Priority species & habitats and, with appropriate mitigation measures secured, the development can be made acceptable.

The mitigation measures identified in the Preliminary Ecological Appraisal (Midnorth Ecology, April 2025) and the Nocturnal Emergence Survey report (Midnorth Ecology, May 2025) should be secured by a condition of any consent and implemented in full. This is necessary to conserve and enhance protected and Priority species particularly those recorded in the locality.

We recommend that any external lighting is sensitive to wildlife and secured by a condition of any consent to avoid impacts to foraging and commuting bats. This must follow the [Guidance Note 8 Bats and artificial lighting](#) (The Institute of Lighting Professionals & Bat Conservation Trust). In summary, it is highlighted that the following measures should be implemented for the lighting design, which could be informed by a professional ecologist:

- Do not provide excessive lighting. Light levels should be as low as possible as required to fulfil the lighting need.
- All luminaires should lack UV elements when manufactured. Metal halide, compact fluorescent sources should not be used.
- Warm White lights should be used at <2700k. This is necessary as lighting which emits an ultraviolet component or that has a blue spectral content has a high attraction effect on insects. This may lead in a reduction in prey availability for some light sensitive bat species.
- Where appropriate, external security lighting should be set on motion-sensors and set to as short a possible a timer as the risk assessment will allow.
- Luminaires should always be mounted horizontally, with no light output above 90° and/or no upward tilt.
- Only if all other options have been explored, accessories such as baffles, hoods or louvres can be used to reduce light spill and direct it only to where it is needed. However, due to the lensing and fine cut-off control of the beam inherent in modern LED luminaires, the effect of cowl and baffles is often far less than anticipated and so should not be relied upon solely.

With regard to mandatory biodiversity net gains, it is highlighted that we now support the submitted Statutory Biodiversity Metric – Calculation Tool (October 2025), the Biodiversity Net Gain Assessment (V4) (Midnorth Ecology, September 2026) and the Condition Assessment Sheets (May 2026), subject to the application red line boundary being updated as shown in the revised Site Location Plan (Revision E) (Hardwick Studio Architects, March 2026).

Biodiversity net gains is a statutory requirement set out under [Schedule 7A \(Biodiversity Gain in England\) of the Town and Country Planning Act 1990](#) and we are satisfied that submitted information provides sufficient information at application stage.

As a result, a Biodiversity Gain Plan should be submitted prior to commencement as part of the discharge of the statutory Biodiversity Gain Condition. This should include the following information for non-phased development:

- Biodiversity Gain Plan form, using the Government's template: <https://www.gov.uk/government/publications/biodiversity-gain-plan>.
- The completed metric calculation tool showing the calculations of the pre-development and post-intervention biodiversity values.
- Completed pre-development and post-development habitat maps.
- Information regarding [Habitat degradation](#) (where required).
- Information regarding [Irreplaceable habitat](#) (where required).

In addition, the following information may also be required depending on whether the development contains significant on-site enhancements or whether off-site options or Statutory Biodiversity Credits are required:

- A [Habitat Management and Monitoring Plan](#) (HMMP) for significant on-site enhancements or offsite measures in blue line boundary land.
- Legal agreement for monitoring and management of significant on-site enhancements or off-site measures in blue line boundary land.
- Evidence of off-site units being allocated to a Biodiversity Gain Site on the [Biodiversity Gain Site Register](#).
- Evidence of proof of purchase of Statutory Biodiversity Credits.

The decision on whether significant on-site enhancements are present is ultimately up to the Council. Where present, the maintenance and monitoring of significant on-site enhancements should be secured via planning obligation for a period of up to 30 years from the completion of development. This will be required at application stage or concurrent with the discharge of the Biodiversity Gain Condition. The management and monitoring of significant on-site enhancements could also be secured as a condition of any consent, but a mechanism to secure monitoring costs should be identified by the Council. The monitoring of the post-development habitat creation / enhancement will need be provided to the LPA at years 1, 3, 5, 10, 15, 20, 25, 30, unless otherwise specified by the LPA. Any remedial action or adaptive management will then be agreed with the LPA during the monitoring period to ensure the aims and objectives of the Biodiversity Gain Plan are achieved.

We are generally satisfied that the post-intervention values are realistic and deliverable. However, it is recommended that the following matters will need to be considered by the applicant as part of the biodiversity gain condition:

- It is highlighted that we do not consider that provision of 'Lowland meadow' Priority habitat to be realistic or deliverable. This is because this habitat contains a very high distinctiveness and is a difficult habitat to create, requiring 16 species per m2 with species

that reflect specific grassland communities (e.g. NVC MG5), with at least four positive indicators for lowland meadows present within the sward. We consider 'Other neutral grassland' as previously proposed to be a more realistic target habitat, unless further justification can be provided.

We also support the proposed reasonable measures for protected, Priority and threatened species, which have been recommended in the Preliminary Ecological Appraisal (Midnorth Ecology, April 2025) to secure net gains for biodiversity, as outlined under National Policy N2 (f) of the National Planning Policy Framework (August 2026). Reasonable biodiversity measures are a separate matter to mandatory biodiversity net gains, and the finalised details should be outlined within a separate Biodiversity Measures to be secured as a condition of any consent.

This will enable LPA to demonstrate its compliance with its statutory duties including its biodiversity duty under s40 NERC Act 2006 (as amended) and delivery of mandatory Biodiversity Net Gain.

Impacts will be minimised such that the proposal is acceptable, subject to the conditions below based on BS42020:2013. We recommend that submission for approval and implementation of the details below should be a condition of any planning consent.

ANY RECOMMENDED CONDITIONS TO BE APPLIED:

1. ACTION REQUIRED IN ACCORDANCE WITH ECOLOGICAL APPRAISAL RECOMMENDATIONS

"All mitigation measures and/or works shall be carried out in accordance with the details contained in the Preliminary Ecological Appraisal (Midnorth Ecology, April 2025) and the Nocturnal Emergence Survey report (Midnorth Ecology, May 2025) as already submitted with the planning application and agreed in principle with the local planning authority prior to determination.

This may include the appointment of an appropriately competent person e.g. an ecological clerk of works (ECoW) to provide on-site ecological expertise during construction. The appointed person shall undertake all activities, and works shall be carried out, in accordance with the approved details."

Reason: To conserve protected and Priority species and allow the LPA to discharge its duties under the Conservation of Habitats and Species Regulations 2017 (as amended), the Wildlife & Countryside Act 1981 (as amended) and s40 of the NERC Act 2006 (as amended).

2. PRIOR TO ANY WORKS ABOVE SLAB LEVEL: BIODIVERSITY ENHANCEMENT STRATEGY

"Prior to any works above slab level, a Biodiversity Measures Strategy for measures to support protected, Priority and threatened species, prepared by a suitably qualified ecologist in line with the recommendations of the Preliminary Ecological Appraisal

(Midnorth Ecology, April 2025), shall be submitted to and approved in writing by the local planning authority.

The content of the Biodiversity Measures Strategy shall include the following:

- a) Purpose and conservation objectives for the proposed measures;*
- b) detailed designs or product descriptions to achieve stated objectives;*
- c) locations of proposed measures by appropriate maps and plans (where relevant);*
- d) persons responsible for implementing the measures; and*
- e) details of initial aftercare and long-term maintenance (where relevant).*

The works shall be implemented in accordance with the approved details shall be retained in that manner thereafter.”

Reason: To enhance protected, Priority and threatened species and allow the LPA to discharge its duties under National Policy NE2 (f) of NPPF August 2026 and s40 of the NERC Act 2006 (as amended).

3. PRIOR TO OCCUPATION: WILDLIFE SENSITIVE LIGHTING DESIGN SCHEME

“Prior to occupation, a “lighting design strategy for biodiversity” in accordance with Guidance Note 08/23 (Institute of Lighting Professionals) shall be submitted to and approved in writing by the local planning authority. The strategy shall:

- a) identify those areas/features on site that are particularly sensitive for bats and that are likely to cause disturbance in or around their breeding sites and resting places or along important routes used to access key areas of their territory, for example, for foraging; and*
- b) show how and where external lighting will be installed (through provision of lighting layout plans, isolux contour plans, luminaire specifications, mounting heights, aiming angles, shielding measures, and lighting control strategies) so that it can be clearly demonstrated that areas to be lit will not disturb or prevent the above species using their territory or having access to their breeding sites and resting places.*

All external lighting shall be installed in accordance with the specifications and locations set out in the scheme and maintained thereafter in accordance with the scheme. Under no circumstances should any other external lighting be installed without prior consent from the local planning authority.”

Reason: To allow the LPA to discharge its duties under the Conservation of Habitats and Species Regulations 2017 (as amended), the Wildlife & Countryside Act 1981 (as amended) and s40 of the NERC Act 2006 (as amended).

Optional condition:

Management and monitoring for significant on-site enhancements should be secured by planning obligation (either at application stage or the Biodiversity Gain Condition), to allow

aftercare and monitoring to be secured for the 30-year period from the completion of development and for the LPA to cover its monitoring costs. However, if the LPA would prefer that this is secured via a separate condition, the following pre-commencement condition could be used:

4. PRIOR TO COMMENCEMENT: HABITAT MANAGEMENT AND MONITORING PLAN (HMMP)

A Habitat Management and Monitoring Plan (HMMP) for significant on-site enhancements, prepared in accordance with the approved Biodiversity Gain Plan, shall be submitted to, and approved in writing by the local authority, prior to commencement of development, including:

- a) a non-technical summary;*
- b) the roles and responsibilities of the people or organisation(s) delivering the HMMP;*
- c) the planned habitat creation and enhancement works to create or improve habitat to achieve the on-site significant enhancements in accordance with the approved Biodiversity Gain Plan;*
- d) the management measures to maintain habitat in accordance with the approved Biodiversity Gain Plan for a period of 30 years from the completion of development;*
- e) the monitoring methodology in respect of the created or enhanced habitat to be submitted to the local planning authority; and*
- f) details of the content of monitoring reports to be submitted to the LPA including details of adaptive management which will be undertaken to ensure the aims and objectives of the Biodiversity Gain Plan are achieved.*

Notice in writing shall be given to the Council when the:

- initial enhancements, as set in the HMMP, have been implemented; and*
- habitat creation and enhancement works, as set out in the HMMP, have been completed after 30 years.*

The created and/or enhanced habitat specified in the approved HMMP shall be managed and maintained in accordance with the approved HMMP.

Unless otherwise agreed in writing, monitoring reports shall be submitted in years 1, 3, 5, 10, 15, 20, 25, and 30 to the Council, in accordance with the methodology specified in the approved HMMP.

The Council shall only issue approval of the habitat creation and enhancement works until:

- the habitat creation and enhancement works set out in the approved HMMP have been completed; and*
- a completion report, evidencing the completed habitat enhancements, has been submitted to, and approved in writing by the Local Planning Authority.*

Reason: To satisfy the requirement of Schedule 7A, Part 1, section 9(3) of the Town and Country Planning Act 1990 that significant on-site habitat is delivered, managed, and monitored for a period of at least 30 years from completion of development.

ANY RECOMMENDED INFORMATIVES TO BE APPLIED:

Biodiversity Gain condition

Natural England advises that the biodiversity gain condition has its own separate statutory basis, as a planning condition under [paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990](#). The condition is deemed to apply to every planning permission granted for the development of land in England (unless exemptions or transitional provisions apply), and there are separate provisions governing the Biodiversity Gain Plan.

The local planning authority is strongly encouraged to not include the biodiversity gain condition, or the reasons for applying this, in the list of conditions imposed in the written notice when granting planning permission. However, it is highlighted that biodiversity gain condition could be added as an informative, using [draft text](#) provided by the Secretary of State:

“Biodiversity Net Gain

The effect of paragraph 13 of Schedule 7A to the Town and Country Planning Act 1990 is that planning permission granted for the development of land in England is deemed to have been granted subject to the condition “(the biodiversity gain condition)” that development may not begin unless:

- (a) Biodiversity Gain Plan has been submitted to the planning authority, and*
- (b) the planning authority has approved the plan.*

The planning authority, for the purposes of determining whether to approve a Biodiversity Gain Plan if one is required in respect of this permission would be Hinckley & Bosworth Borough Council.

There are statutory exemptions and transitional arrangements which mean that the biodiversity gain condition does not always apply. These are listed in paragraph 17 of Schedule 7A of the Town and Country Planning Act 1990 and the Biodiversity Gain Requirements (Exemptions) Regulations 2024.

Based on the information available this permission is considered to be one which will require the approval of a biodiversity gain plan before development is begun because none of the statutory exemptions or transitional arrangements are considered to apply.”

PRE-DEVELOPMENT HABITAT BASELINE FOR BIODIVERSITY NET GAIN (BNG)

THIS IS THE MINIMUM NATIONAL ESSENTIAL INFORMATION REQUIREMENTS (PPG paragraph 11) AND MUST BE SATISFIED PRIOR TO DETERMINATION:

Confirmation that development is subject to statutory biodiversity gain condition	Y
Pre-development Habitat Plan of existing onsite habitat (to scale)	Y
Pre-development Habitat Value (on date of application or earlier)	Y
Completed Metric Calculation Tool	Y
Statement of Habitat Degradation where present (with dates and details)	Y
Reason for proposing an earlier date if applicable (ie. degradation)	Y
Description of Irreplaceable Habitat where present	N/A
SMALL SITES METRIC ONLY: "Competent person" information (ie. qualifications, skills, experience)	N/A
BNG METRIC INFORMATION missing or incorrect:	
Incomplete or incorrect cells are shown in metric (eg. habitat quantity, type or condition, strategic significance)	N

POST DEVELOPMENT PROPOSALS FOR BIODIVERSITY NET GAIN (BNG)	
PLEASE NOTE: THIS IS NOT ESSENTIAL INFORMATION PRIOR TO DETERMINATION. Post-development information is indicative only ; final proposals must be confirmed at Biodiversity Gain Plan statutory condition stage.	
ON-SITE SIGNIFICANT* BNG is proposed (If Y, please see later table)	Y
OFF-SITE APPLICANT-OWNED BNG is proposed (ie. Land shown on plan within the "blue line" boundary and inserted in "offsite" tab of statutory metric)	N
PLEASE NOTE: Where applicant-owned off-site or significant on-site BNG proposals are present, these should be secured and monitored for 30 years. The determining authority is responsible for monitoring for compliance.	
OFF-SITE PURCHASE** of BNG	
BNG units purchase from a third party to achieve 10% BNG uplift	TBC
Statutory biodiversity credits	TBC
PLEASE NOTE**: Where purchased BNG units are proposed, any purchased units from the national register are secured and monitored for 30 years by conservation covenant, separately from this planning application process.	

POST DEVELOPMENT PROPOSALS:		
*TYPE OF SIGNIFICANT ON-SITE HABITAT PROPOSED: (using the current government definition ¹)		
SIGNIFICANCE AS DEFINED IN PPG	POST DEVELOPMENT HABITAT TYPE PROPOSED	NUMBER OF UNITS
Medium or High Distinctiveness	TBC	TBC
Large number of units at Low Distinctiveness	TBC	TBC

¹ <https://www.gov.uk/guidance/make-on-site-biodiversity-gains-as-a-developer#significant-on-site-enhancements>

Significant increase in Distinctiveness, Condition or Area	TBC	TBC
---	-----	-----

Note for applicants: Please be aware that this advice is provided to the Local Planning Authority through a Service Level Agreement between the Local Planning Authority and Leicestershire County Council Ecology Team. Its purpose is to discharge the legal duties of the determining authority under The Local Authorities (Functions and Responsibilities) Regulations (2000), Regulations 4.

If you have any queries about the content, please correspond directly with the Planning Officer assigned to the planning application or discharge of condition application. We are unable to respond directly to applicant enquiries regarding the advice that we have provided to the determining authority.

The following legislation is used to assist in the assessment of planning applications:

Legislation source	Reference
National Planning Policy Framework	Paragraphs relevant to biodiversity, biodiversity net gain, ecological connectivity and protected species
Environment Act 2021	Mandatory Net Gain Biodiversity Duty Local Nature Recovery Strategy
District or Borough Local Plan and supporting SPDs	Local Plan policy
ODPM circular 06/2005: Biodiversity and Geological Conservation	Requirement for species survey work and mitigation recommendations to be carried out prior to the determination of a planning application. Paras. 98 and 99
NERC Act 2006 (as amended)	Biodiversity Duty (see also Environment Act 2021) Section 41, habitats and species of Principal Importance (previously BAP)
Various International, European and National laws in relation to the protection of species and habitats	International and national site protection: Ramsar sites (from Ramsar Convention), (Natura 2000 sites include SACs and SPAs), SSSIs, National Nature Reserves, Local Wildlife Sites, Local Nature Reserves. Habitats and Species protection: Conservation of Habitats and Species Regulations 2017 (as amended) (protected sites and species). Wildlife and Countryside Act 1981 (as amended) including special Schedule 1, Natural England Standing Advice. Protection of Badgers Act 1992.
