Registered No: 484783
Registered Office: Peckleton Lane Desford Leicester

Ref: Building 86 Waste Building Planning Statement

Dear Sir/Madam

Subject: Planning Statement

On the Caterpillar BCP Desford site, we have a requirement to install a single building used for recycling processes and storage of recycled waste generated on site.

The proposed building will be located on the West Yard adjacent to Building D where we house our main product lines. The building will have no impact on traffic into the site or any parking requirements on the site. The building aims to be an area in which we can process and store recycled waste to reduce landfill waste and reduce the carbon footprint produced on this site. It will also provide coverage from the elements for the people who work in this area.

No landscaping will take place as part of the installation of the building.

The building will mainly be used between the hours of 06:00AM and 16:00PM

Yours Sincerely

Utilities Section Manager
