Parking to Garden Ratio - (Main Spine)

Garden Frontage / POS

Parking / Drive Apron

Following an examination of the parking-to-garden ratio along the main spine road, the summary below presents the percentages along the road frontage in a linear format:

- Plots 91-116 (in isolation): 66% Parking vs. 34% Garden
- Full length of road: 48% Parking vs. 52% Garden
- Both sides of the spine: 33% Parking vs. 67% Garden

The above clearly demonstrates - when considering the full length and both sides of the road, the amount of garden significantly exceeds parking.
