Hi Sarah

I understand you have discussed the above with Dr Shahor this morning and, from his subsequent call to me, I am a little concerned that things may become confused with Richard being away at present

The position we are in is that we have discussed with Matt Lennon the amendments required and we have provided information in respect of the operation which he seems happy with. The only thing which Richard needed to be aware of in that respect was that we need to discuss controlling future uses. I have discussed this with Matt and would suggest the most appropriate method for all parties would be to limit the consent use to it's specific use so that if someone wanted to come along in the future and run a standard GP's clinic they would need consent and this is clearly far preferable to a personal consent

Otherwise Richard was happy with the scheme, we had shared pre-submission and post-submission discussions with him and the only issue was resolving the highways aspect. No doubt Matt will be able to comment on the information I forwarded to him yesterday when he comes into your office on his regular visit and if he needs any further clarification obviously I would be happy to provide it

Thank you for your continuing interest in this application

Regards

George
