RE: Residential site at Sketchley Grange, Burbage

Dear Resident,

The first phase of site enabling works are now coming to a conclusion and we are due to commence the next stage of preparatory works on 8th of July 2024 for a period of 6 weeks. During this period the work will, from time-to-time, involve piling works and therefore some noise and vibration. This will be closely monitored and will be conducted within limits set by British Standards. Persimmon Homes will also apply 'Best Practicable Means' (BPM), as defined by the Environmental Protection Act 1990, to minimise the impact of these works on yourself and other neighbouring residents of the site.

Our objectives are, as far as reasonably practicable, to control and limit noise and vibration levels so that affected properties and other sensitive receptors are protected from excessive noise/vibration levels associated with construction activities during this stage of works. We appreciate that you will experience some noise and vibration, for which we apologise for in advance, but we assure you that the work will be undertaken in the quickest period possible in order to minimise the impact upon you and other neighbouring residents.

Persimmon Homes would like to take this opportunity to thank you for your ongoing cooperation as we continue to redevelop this former industrial site.

For any queries during the works on site, please contact the PC Contractor's, C3 Construction, office on 0116 2764006.

Any general queries please contact our office on 01162815600.

Yours Sincerely,

Charles Church North Midlands
