SUMMARY OF ECOLOGICAL DOCUMENTS CONSIDERED:		
- Proposed plans and elevations – 29.11.2024 - Existing plans and elevations – 29.11.2024		
REASON FOR RECOMMENDATION PROVIDED:		
- The proposed development consists of the demolition of the existing conservatory to be replaced with a single storey extension and a partial garage conversion. It is sited in an area which is well connected to the surrounding arable landscape. - Nevertheless, the works tie into a small section of the existing building where the conservatory is currently sited. - Therefore, the proposed development is likely to have minimal impact on ecology and no ecological surveys are required. - I have no objection. However please see the below recommended informative

RECOMMENDED CONDITIONS TO BE APPLIED:
•
RECOMMENDED INFORMATIVES TO BE APPLIED:
The property may be suitable for roosting bats, which are protected by law from harm. It is the applicant's responsibility to ensure that bat legislation is not breached, and therefore may need to consult with a licenced bat ecologist prior to commencement to ensure that bats will not be impacted by the works. The applicant should ensure that all contractors and individuals working on the property are aware of this possibility, as works must cease if bats are found during the course of the works whilst advice from a bat ecologist is obtained. Bats are particularly associated with the roof structure of buildings, including lofts, rafters, beams, gables, eaves, soffits, flashing, ridge-tile, chimneys, the under-tile area, etc. but may also be present in crevices in stone or brickwork and in cavity walls.
