Michael

I refer to our telephone conversation today regarding the discharge of conditions application for 08/00172/FUL.

I can confirm that the reclaimed roof tiles are acceptable. The colour of the proposed render is acceptable but it is important to ensure that the finish matches with the smooth finish of the existing building.

I have some concern regarding the bricks used but can see that they match in terms of finish and bonding although the colour match is poor. I accept that it is your intention to provide white mortar which will help improve the appearance of the extension and am happy to wait to see what effect this will have before recommending further action such as dyeing the bricks in order to make the bricks assimilate better.

Please contact the office again when the mortar have been provided and a further site inspection will be arranged.

Regards

Louise Forman
Area Planning Officer
