planning drawing rev A.pdf (63...

Dear Sir or Madam

Further to your letter dated the 3rd March 2009 I am pleased to attach a copy of the revised planning drawing amended to identify the development site to the rear of the application site as agreed in regard to item 3 of your lettewr.

With regards to item 1 , I have contacted Mark Walton as requested and he has confirmed that and ecology report would not be required in this instance and the development would be subject to a watching brief Mr Walon will speak to the planning officer and confirm this.

Finaly with regards to item 3 as discussed the parking provision for the site is discussed in detail in the Design and Access Statement.

I trust this clarifies the situation and the application can now be validated.

Regards

Darren Insley
