### Comments Details

The scheme needs to make provision for waste and recycling storage and collection across the site. Details should address accessibility to storage facilities and adequate collection point space at the adopted highway boundary.

Important to note that all waste services have a collection point at the boundary with the adopted public highway.

Comments: If all or part of the new road to the new properties is to be private (un-adopted) then consideration will need to be given to adequate and safe collection point space at the adopted highway boundary for the placement of all the containers on collection day (up to 2 bins per property at one time).

We do not travel along or collect from private/shared driveways, if these are to be installed a Bin Collection Point will need to be installed on the boundary of the adopted highway, and no more than 5 metres from the highway, please ensure the space is adequate for all containers on collection day.

Kind regards
