For the attention of Joanne Orton

11th July 2011

Dear Ms Orton,

Re: Planning Application Number 11/00532/COU 12 Wellington Close Burbage LE10 2GH

Following the Planning Portal submission in respect to the above I write regarding ecology matters.

I have been in contact with Mr Mark Walters of Leicestershire Ecology specifically regarding bats but also other animals, flora and forna. He has stated that in his opinion a bat survey is not required. Further with regard to newts as the proposal is in excess of 250 metres distant from a "wet" ditch or water course then a survey is also not required.

I anticipate you will include on the planning approval a condition regarding a watching brief for bats and other ecology matters.

Yours sincerely

Stewart Anderson
