Specification & Reasoning of Proposed Tree Works

Specification

We propose to prune to Wild Cherry tree and Apple tree located on the corner of The Square which joins Main Street. The two trees are located behind a fence and a bench in the corner of a grass paddock. The pruning will involve a 3m crown raise to the trees where they are overhanging the footpath and highway. This will be done in accordance with the Highways Act.

Reasoning

The reason for the proposed works is due to the branches overhanging the footpath and highway. By managing the trees properly it will add to the character of Sutton Cheney. These works will provide better specimens if permission is granted.
