SUMMARY OF ECOLOGICAL DOCUMENTS CONSIDERED:		
Applicant submitted information: Sections, Roof Plans, Existing and Proposed Site Elevations, Site Location Plan, Proposed Layouts		
REASON FOR RECOMMENDATION PROVIDED:		
- The proposed works consist of a front dormer. The works involve significant alterations to the bungalows existing roof, tiles and roof void of the existing dwelling, all of which may provide access and suitability for roosting bats. - Sited with Slate Brook nearby and good connectivity to nearby agricultural habitat. There is also a large area of woodland which leads to another nearby river. Therefore, the surrounding habitat provides suitable habitat connectivity and foraging opportunities for bats. - As such, considering the nature of the works, submission of a Preliminary Roost Assessment (PRA) will be required on the existing dwelling prior to commencement. The survey will need to be carried out by a suitably licenced ecologist and can be carried out at any time of year. The PRA should include internal and external photographs. - I have a holding objection until this is supplied.
