Recommend Refusal	
Holding Objection - Further information required	
REASON FOR RECOMMENDATION:	
- We have reviewed the above document, which is acceptable, showing there is negligible potential for roosting bats. - The site is located within a 'Swift Alert' zone as it is within 250m of a number of recorded nest sites. Swifts are a declining species, and a priority species in our Local Biodiversity Action Plan, therefore ecological enhancements in the form of swift boxes should be installed on the existing building. These should be made of woodcrete for longevity, and located at least 5m above the ground, in a shaded area, and with a clear approach.	
ANY RECOMMENDED CONDITIONS TO BE APPLIED:	
No development shall take place until a swift (Apus apus) enhancement scheme has been submitted to and approved in writing by the Local Planning Authority. This is to detail the provision of a minimum of 1 woodcrete nest boxes, the make/model and location on building. All works are to proceed strictly in accordance with the approved scheme.
