Subject: 09/00426/FUL - Installation of floodlighting system

Dear Mr Hicks

09/00426/FUL
Installation of floodlighting system, Market Bosworth Rugby Club

Cadeby Parish Council discussed the above application at a council meeting on 25th June and asked that the following comments be put in writing for response by H&BBC.

In order to minimise the impact of light pollution, who will be responsible for ensuring the application meets appropriate environmental guidelines? Mr Simon Smith from H&BBC states in an email:

"This development has the potential to cause impact from light on neighbouring residential dwellings. It therefore needs to be ensured through assessment that the design, location and installation of the light is such that it will not impact on residents. Environmental Health are not able to make such assessments."

In addition, has a wildlife assessment been completed as we have been lead to believe by a local resident that there are owls nesting in the area and the additional floodlighting could impact them adversely?

We look forward to hearing from you and in the meantime please do not hesitate to contact us if you require any further information.

Yours sincerely

Cadeby Parish Council
