Verification of application Evidence

I cannot provide the in depth details as yet as I do not have any quotes sourced for these works.

The lawful certificate was just to ensure this extension was allowed and can progress.

Both of my neighbours have their properties extended by a single story so this will be fine to go ahead with BD regulations.

Having the certificate would be peace of mind for me as I'd like to think the project is verified through the BD regulations.

The drawing I have sent as part of the application shows the design to be quoted by contractors at this stage.

I am looking at commencing the project come Spring 24 all being well.

As mentioned in the application the size will be 3m x 5m x 3m.

I hope that is enough evidence at this stage to allow the lawful certification of this extension.

Kind regards,

Adam Lewis.
