Re: Heart of England Boxing Club- The Christian Hobbs Gym

To whom it may concern

England Boxing is the National Governing Body for the sport of Boxing, we provide much needed services, resources and support to clubs, schools, and recreational sessions throughout the nation. England Boxing's main objectives are to focus on club support and growth for what has become the UK's fastest growing sport.

As the England Boxing Club Support Officer for the East Midlands, I am writing to express my support for the Heart of England Boxing club and their project to build the Christian Hobbs gym, a new state of the art facility; I am in full support of their developmental plans for growth and community outreach. I can confirm we will work in partnership with Heart of England Boxing and other parties involved in the project to help support the club, set-up, funding bids and physical activity service towards the goals of the project and contribute in-kind towards its success.

Boxing has proven to be both popular and successful in engaging older people, young people, and women/girls in Leicestershire and nationally. This success demonstrates the need and demand for this type of project. Boxing has a unique appeal and it has the ability to attract all ages, abilities, and fitness levels into physical activity and therefore we fully support the growth of boxing across England and this project in particular.

England Boxing would like to endorse any application for funding and offer any grant support available to a committed project and boxing club.

Yours faithfully,

Ellie Davis
