SUMMARY RESPONSE:

Holding Objection - Further information required	
Condition recommended	
Informative recommended	
REASON FOR RECOMMENDATION PROVIDED:	
• The Preliminary Ecological Appraisal (PEA) carried out by Griffin Ecology Ltd (November, 2023) is acceptable. • No evidence protected or priority species were identified on-site, therefore no further surveys are required. • The proposed development retains all hedgerow and important trees with an appropriate buffer, but will involve the loss of all semi-improved grassland. • There is a small risk, as identified in the PEA, to potential populations of GCN, and the PEA recommends the submission of a CEMP. However, given the lack of nearby records, and no individuals being found during the adjacent development, I don't deem this proportionate to the impact of the development. • In order for the proposed development to demonstrate measurable net gains for biodiversity, as required by the NPPF, a biodiversity enhancement scheme should be provided prior to commencement. • Therefore, the below Condition and Informative should be attached to any permission.

Any enhancement measures need to be shown on all relevant submitted plans. All works are to proceed strictly in accordance with the approved scheme.
RECOMMENDED INFORMATIVES TO BE APPLIED:
Nesting birds are protected under the Wildlife & Countryside Act 1981 (as amended); therefore, vegetation clearance should take place outside the breeding season (March to August inclusive) unless carefully checked beforehand by a suitably qualified person.
