

Condition Sheet: URBAN Habitat Type													
Habitat Types													
Sparsely vegetated land - Ruderal/Ephemeral Sparsely vegetated land - Tall forbs Urban - Allotments Urban - Biodiverse green roof Urban - Bioswale Urban - Cemeteries and churchyards Urban - Facade-bound green wall Urban - Ground based green wall Urban - Intensive green roof Urban - Open mosaic habitats on previously developed land Urban - Rain garden Urban - Sustainable drainage system (SuDS) Urban - Vacant or derelict land Urban - Bare ground													
Habitat Description													
Ruderal/ Ephemeral - Mostly bare earth with 50% vegetation													
See the Statutory Biodiversity Metric User Guide for green roofs, and UK Habitat Classification (UKHab) for other habitats: ukhab – UK Habitat Classification													
On-site or off-site, site name and location		On Site, Cold Comfort Farm Glamping, Comfort Farm, Rogues Lane, Hinckley LE10 3DX	Survey date and Surveyor name		23/05/2025 Anna Scott-Swift								
			Survey reference (if relating to a wider survey)		UKHab Baseline Survey								
Limitations (if applicable)		N/A	Habitat parcel reference

			Grid reference										
Condition Assessment Criteria		SP 41802 96442											
			Criterion passed (Yes or No)										Notes (such as justification)
Core Criteria - must be assessed for all urban habitat types :													
A	Vegetation structure is varied, providing opportunities for vertebrates and invertebrates to live, eat and breed. A single structural habitat component or vegetation type does not account for more than 80% of the total habitat area.		No										
B	The habitat parcel contains different plant species that are beneficial for wildlife, for example flowering species providing nectar sources for a range of invertebrates at different times of year.		No										
C	Invasive non-native plant species (listed on Schedule 9 of WCA ¹) and others which are to the detriment of native wildlife (using professional judgement) ² cover less than 5% of the total vegetated area ³ . Note - to achieve Good condition, this criterion must be satisfied by a complete absence of invasive non-native species (rather than <5% cover).		Yes										
Additional Criterion - must be assessed for Open mosaic habitat on previously developed land only:													
D	The parcel shows spatial variation and forms a mosaic of bare substrate PLUS: - At least four early successional communities (a) to (i); Communities: (a) annuals; (b) mosses/liverworts; (c) lichens; (d) ruderals; (e) inundation species; (f) open grassland; (g) flower-rich grassland; (h) heathland, (i) pools.		No										
Additional Criteria - must be assessed for Bioswale and SuDS habitat types only:													
E1	Plant species are mostly native. If non-native species are present, they should not be detrimental to the habitat or native wildlife ⁴ .		No										
E2	The vegetation is comprised of plant species suited to wetland or riparian situations.		No										
Additional Criterion - must be assessed for Intensive green roofs only:													
F	The roof has a minimum of 50% native and non-native wildflowers. 70% of the roof area is soil and vegetation (including water features).		No										
Additional Criterion - must be assessed for Biodiverse green roofs only:													

G	The roof has a varied depth of 80 – 150 mm; at least 50% is at 150 mm and is planted and seeded with wildflowers and sedums or is pre-prepared with sedums and wildflowers.	No											
	Note – to achieve Good condition, some additional habitat, such as sand piles, stones, logs etc. are present.												
Essential criteria relevant for habitat type achieved (Yes or No)		No											
Number of criteria passed		2											
Condition Assessment Result		Condition Assessment Score	Score Achieved *//										
Results for habitats requiring assessment of 3 core criteria only (all listed urban habitats except Open mosaic habitat on previously developed land, Bioswale, SuDS and Green roofs):													
• Passes all 3 core criteria; AND • Meets the requirements for Good condition within criterion C.		Good (3)											
• Passes 2 of 3 core criteria; OR • Passes 3 of 3 core criteria but does not meet the requirements for Good condition within criterion C.		Moderate (2)											
• Passes 0 or 1 of 3 core criteria.		Poor (1)	Yes										
Results for Green roofs and Open mosaic habitat on previously developed land (requiring assessment of 4 criteria only - core criteria plus additional criterion specified for habitat type):													
• Passes all 3 core criteria; AND • Meets the requirements for Good condition within criterion C; AND • Passes additional criterion relevant to specific habitat type (D, F or G).		Good (3)											
• Passes 2 or 3 of 4 criteria; OR • Passes 4 of 4 criteria but does not meet the requirements for Good condition within criterion C.		Moderate (2)											
• Passes 0 or 1 of 4 criteria.		Poor (1)											
Results for Bioswale or SuDS (requiring assessment of 5 criteria - core criteria plus additional criteria specified for habitat type):													
• Passes all 3 core criteria; AND • Meets the requirements for Good condition within criterion C; AND • Passes all additional criteria relevant to specific habitat type (Group E)		Good (3)											
• Passes 3 or 4 of 5 criteria; OR • Passes 5 of 5 criteria but does not meet the requirements for Good condition within criterion C.		Moderate (2)											
• Passes 2 or fewer of 5 criteria.		Poor (1)											
Suggested enhancement interventions to improve condition score
